1)Have you ever faced a situation where you would like to join a game, but you do not know anyone?

Yes, I have faced this situation before numerous times while in college. One instance I could think of is, I wanted to play badminton but do not know others who had interest in playing badminton. And sometimes it is difficult to join the game while they are playing because they often play set of games like a tournament.

2) What kind of features would you like to have in these applications?

I would like to see recommendations of people and groups who have similar interests, feature to send friend requests to people and also ability to send messages once they accept my request, so that we could potentially discuss about the time and place for the game.

3) Are there any privacy concerns you have for this application

No, I do not have any privacy concerns for the application.

4) Do you prefer to use an application and form a group to play a game or just go to a location and randomly ask people who are playing?

I prefer to use the application and form a group to play rather than going to a location and randomly asking people. Because often times people come in groups and play matches, so it would be difficult to interrupt them. Playing with random strangers sometimes might not be go well, because of the level of game play, some are beginners, and some are professionals. I find playing with people of same level to be much more enjoyable.

5) How would you choose a group or other players?

I would choose based on the kind of interest (game) and the level of game play.

6) What kind of information would you like to know about the user or the group?

I would like to know the Name, preferred name, pronouns, a few sentences describing about themselves, Sports they are interested in and finally how proficient they are in the game (level).
